

## Party King Varsity DLX SS Grill Head

BTU 12,000 BTU (\*- 2000 BTU)

\*MICRO-ADJUSTABLE TEMPERATURE CONTROL VALVE (New for summer 2013 VARSITY Grills and standard on all 2014 Party King Grill models)

The "LOW" setting gas flow can be adjusted to raise or lower the minimum heat output of the grill. Note this only affects the "LOW" setting while the "HI" setting will not be affected.

To change setting, first ignite burner and set on "LOW". Remove control knob (The knob uses a small latch, and with enough pressure can be snapped on and off easily.) Using a flat head screwdriver, find the internal brass adjustment screw. Adjust to desired flame size.

- Dimensions: Overall ext high 13.5"
- Overall ext depth 15" including handle
- Overall ext width 24.75"
- Interior height from grate to top of underside hood 6.75"
- Grilling surface 11.25" x 18.5"
- Single grate
- 5mm solid stainless grate rods
- Weight 33 pounds
- Single straight stainless steel burner and heat deflector for even heat distribution.
- Attractive chrome heavy duty steel hood handle.
- Stainless steel front control panel.
- Electronic ignition for quick, safe flame starts built in each control knob. (No battery needed)
- Calibrated temperature gauge.
- Full one-year limited warranty on all grill components.

- Fuel hose fits standard 20 pound LP tank or TVM, twin-valve dual tank manifold.
- Full tubing frame with all-around welds for strength and rigidity.
- 16 gauge Fold up stainless side shelves (no pins, no latches, won't collapse)
- Strong tubular steel handles for easy manipulation.
- Hinge-open back panel to allow clean out
- Full side panels and back panel with plenty of space for custom graphics heavy-duty bolted construction.
- Black powder-coating for a durable, rust-resistant finish.
- Mounts for twin-valve dual-tank manifold
