- Grilling height when mounted on Backyard Grill Stand: aprox 32.75" H.
- Full one-year limited warranty on all grill components.

IMPORTANT- APPLIES TO ALL PARTY KING MVP GRILLS:

As with all gas grills, care and caution must be taken during use. Party King MVP Grills are designed to vent thru the top. Never face backside of grill into the prevailing oncoming winds when using. The upper rear portion of the grill hood is the exhaust. Face grill hood opening side (side with temperature controls) into the wind to avoid excessive heat issues.

When grilling large amounts of food, more than 15-20 servings (depending up the amount of grease in the meats) we recommend periodically burning off excess grease to prevent flare ups. To do this simply remove all food, turn the grill to high and burn for 3 - 5 minutes, then turn off the fuel and let the grill burn itself out. NOTE: It is very important to remove the ash tray and clean it then reinstall before burning the grill out.
